PROJECTS

SubSync — Subscription Management Mobile App

UI/UX Case Study | [View Case Study](#)

- Designed a mobile application to help users track subscriptions, monitor spending, manage renewals, and identify potential savings — supporting multiple subscription categories.
- Conducted user research with 15 survey participants and 5 user interviews, then translated findings into information architecture, user flows, low-fidelity wireframes, and high-fidelity UI screens.
- Built a consistent design system including typography, color palette, spacing, grid, and reusable UI components to maintain consistency across the app.
- Designed key end-to-end user flows for onboarding, adding subscriptions, managing subscriptions, renewals, reminders, and spending insights.
- Reviewed and refined the high-fidelity prototype based on design feedback, improving clarity, navigation, and overall usability.
- Created an end-to-end UX case study documenting the complete design process, from research through final UI.
